

## DATASHEET

### GMS – CLOUD BASED WEB INTERFACE

#### MAIN FEATURES

- ▶ Cloud enabled cardholder administration portal
- ▶ Manage cardholders from any web enabled device (create/edit/print/delete)
- ▶ Assign access privileges
- ▶ Support for temporary access
- ▶ Search and filter
- ▶ Cardholder photograph capture
- ▶ Generate cardholder based reports online
- ▶ Support for many web operators simultaneously
- ▶ Complete audit logging
- ▶ Custom web interface (host your own logo and images on the web page)
- ▶ Send commands directly from the web (e.g. unlock/lock door)
- ▶ Built-in security for maximum data protection

***PACOM GMS is the perfect multi-site security management platform, providing integration between access control, intrusion, video, intercom, and virtually any building management or security solution.***

#### GMS CLOUD BASED WEB INTERFACE

The simplicity of PACOM GMS access management has increased with the intuitive PACOM GMS Cloud based card administration solution. GMS operators can now perform card access management from virtually anywhere using their existing web browser.

GMS Operators can create new cards, edit existing cards, delete cards, assign access levels, provide temporary access, and even generate card access reports remotely using the GMS cloud based solution. Using a USB camera, operators can capture a photo of the cardholder and save it to that cardholders profile.

Even though access can be made using the cloud, security is still paramount and all the operator partitioning of GMS still applies, based upon the credentials used to login.

Card Access Reports can also be generated across the web, allowing a supervisor to quickly retrieve the whereabouts of cardholders. The reports can then be saved in many popular formats for emailing or saving to a file.

## DESCRIPTION

- ▶ No software installation required
- ▶ Straightforward to maintain and update
- ▶ Accessible, authorized operators can logon anywhere they have internet access
- ▶ Partitioned so that operators can only view information to which they are allowed
- ▶ Safe, operators can only perform actions according to their privilege level (view only, edit, create / delete)
- ▶ Intuitive, simple to use and administer
- ▶ Useable, can operate across multiple platforms (PC, Tablet, Smart Phone)
- ▶ Expandable, supports many users simultaneously

## REQUIREMENTS

### COMPONENT

GMS Version

GMS Web Module

Web Server

Web Browser

### SPECIFICATION

V4.10 or later

V3.0

Microsoft IIS (Internet Information Services) V7.5

Microsoft Internet Explorer V11.0 or later (Other browsers may also be compatible, but have not been explicitly tested for compatibility and may not support all features).

## ORDERING INFORMATION

### PART NUMBER TYPE CODE

### DESCRIPTION

100 045 011	GMS-WEB5	GMS Version 4 license for 5 additional card access web clients.
100 045 012	GMS-WEB10	GMS Version 4 license for 10 additional card access web clients.
100 045 013	GMS-WEB25	GMS Version 4 license for 25 additional card access web clients.
100 045 014	GMS-WEB50	GMS Version 4 license for 50 additional card access web clients.
