

DATASHEET

GMS VIDEO – EXACQVISION INTEGRATION

MAIN FEATURES

- ▶ Visually verify any threat easily and quickly
- ▶ Show live and recorded video in response to any alarm or event
- ▶ Recall recorded video direct from the Transaction Manager status message
- ▶ Quickly show live video by clicking on an icon on a graphical site map
- ▶ Move a camera to a preset position
- ▶ Onscreen PTZ (Pan, Tilt, Zoom) controls for camera movement and positioning

PACOM GMS provides the perfect surveillance and video verification solution with its intelligent interface to exacqVision products. This integration adds a new dimension to integrated access, alarm and video interoperability.

PACOM GMS EXACQVISION INTEGRATION

GMS allows you to easily combine access control, intruder alarm, messaging and video verification in a single security management solution. The GMS exacqVision Video plugin enables a seamless link with exacqVision video solutions to provide a completely integrated security solution.

Video verification can be easily performed from the convenience of any GMS workstation in your security network. When actioning events from a GMS workstation, GMS operators can be automatically shown the associated live and recorded video footage. This video integration enables operators to quickly and visually verify any threat, and put in place the appropriate alarm handling procedure to ensure the threat is effectively managed. Recorded video can also be recalled by simply double clicking a status message/event in the Transaction Manager. The recorded footage displayed will be synchronized with the time of the status message/event.

Camera icons can also be easily added to a GMS interactive site map to provide operators with a graphical representation of security video equipment installed at a site. By simply clicking a camera icon, live video is streamed directly from the selected camera to GMS workstations and displayed adjacent to the site map and transaction log.

FEATURES SUMMARY - EXACQVISION

LIVE VIDEO

Stream live video to GMS on alarm or event Yes

PTZ

Use built-in PTZ controls for camera movement Yes Create a preset position No

Pan, Tilt, Zoom (PTZ) using virtual mouse No Modify a preset position Yes

Move camera to a preset position Yes

RECORDED VIDEO

Search and play recorded video Yes Step backward one frame Yes

Pause recorded video Yes Play fast forward Yes

Go to first frame of recorded video No Play fast rewind Yes

Go to last frame of recorded video No Play previously exported video file No

Step forward one frame Yes

EXPORT

Save current image snapshot to local PC Yes Save video clip to local PC Yes

AUDIO

Stream audio from DVR to GMS (listen-in) No Transmit audio from GMS to DVR (microphone) No

GRID DISPLAY

Stream live or recorded video to the GMS configurable Grid Display No Link grid templates to individual events and alarms No

Support for automated grid templates No

VIDEO ALARMS/MACROS

Show video analytics alarms generated by the video device No Show system fault alarms generated by the video device No

Show tamper alarms generated by the video device No Send commands (Macros) to the video equipment (e.g., change framerate) based on event or alarm. No

GENERAL

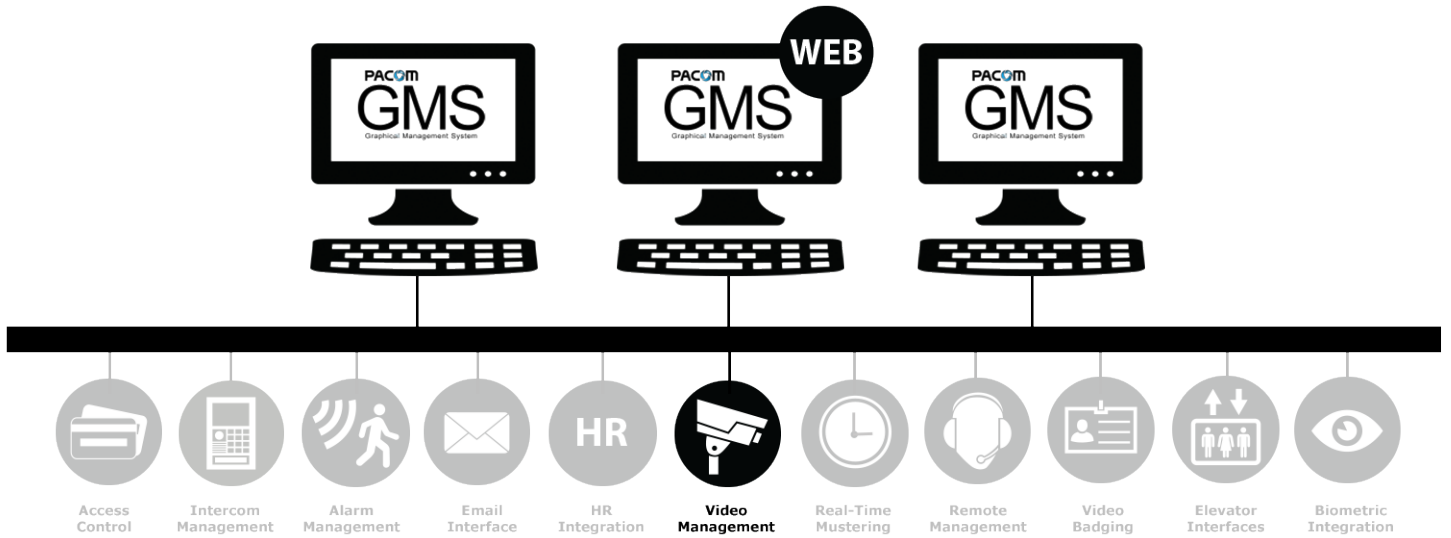

Able to provide real camera names in the "Camera Selection" list Yes Recorded video playback from transaction log No

Generate - Read device configuration and automatically create devices No Switch cameras to specific monitor No

Support for pre-programmed sequence No

SUPPORTED DEVICES

This integration supports all cameras that are compatible with the specified exacqVision SDK version 1.28.10.89912. Please refer to www.exacq.com for more information.

COMPATIBILITY

GMS exacqVision Plugin Version: 1.0

GMS Version: 4.20 or later

DVR Framework Version: 10.4 or later

exacqVision SDK Version: 1.28.10.89912

ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
100 044 001	GMS-VIDEOMON	GMS DVR Module including support for 25 cameras
100 044 011	GMS-CAM5	GMS additional 5 Camera license
100 044 012	GMS-CAM10	GMS additional 10 Camera license
