Support for automatic upload of configuration to Unison.

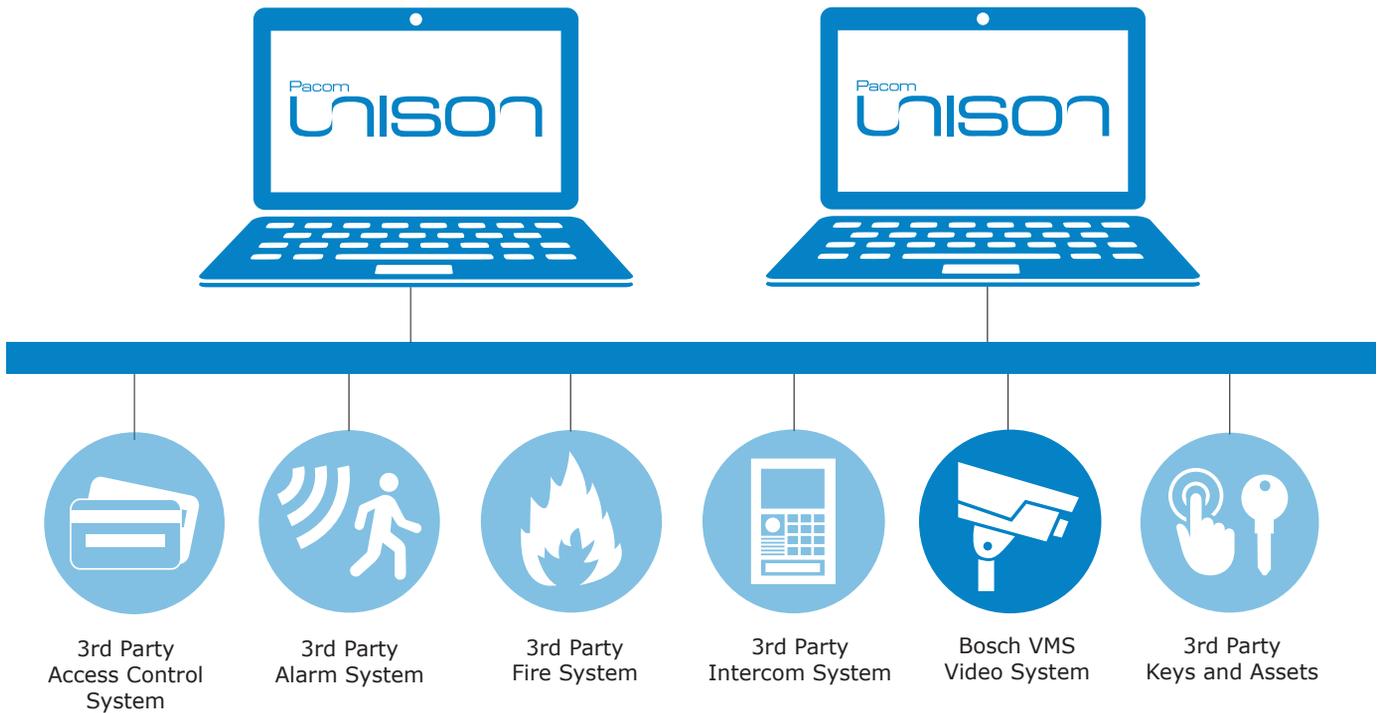

Unison is a market leading platform with the ability to link video with alarms and other events in an efficient way. Unison uses the latest technology and offers a powerful and user friendly solution that suits all types of businesses and organizations.

PACOM UNISON

Unison cleverly acts as a “bridge” between video and other sub-systems. Video from a camera located at the alarm point is automatically controlled by Unison, making an alarm easy to verify. This allows the operator to take immediate action and to focus on relevant surveillance images.

BOSCH VMS

For more than 100 years, the Bosch name has stood for quality and reliability. Bosch Security Systems are proud to offer a variety of security systems for fire alarms, intrusion alarms, security alarms, CCTV, superior systems and communications to help you find a suitable solution. Bosch is the obvious choice of a global provider of innovative technology with the highest level of service and support. Select Bosch when you need a partner who you can trust.

DESCRIPTION

Bosch Video Management System (VMS) provides easy handling of digital video, audio and data over an IP network. It seamlessly combines Bosch IP cameras, encoders, video management and recording systems, and allegiant matrix switches, resulting in users never have to worry about where the video comes from.

COMPATIBILITY

Bosch VMS v5.5.5, v6.0 and v6.5

Bosch VMS Server v5.5.5.258

Bosch VMS Client v5.5.5.258

Unison Version 5.8
