

DATASHEET

UNISON – MESSAGE MANAGEMENT

MAIN FEATURES

- ▶ Message in case of event or alarm
- ▶ SMS or e-mail to users in Unison
- ▶ Create recipient group for e-mail
- ▶ Send reports via e-mail
- ▶ Scheduling e-mail distribution

Unison is a market leading platform with the ability to link various vendors' alarm systems. Unison uses the latest technology and offers a powerful and user friendly solution that suits all types of businesses and organizations.

PACOM UNISON

PACOM Unison is designed to provide easily managed alarm systems for all kinds of businesses. This makes Unison a suitable solution for organizations and customers with high demands on flexibility and ease. Unison cleverly acts as a "bridge" between sub-systems. When an alarm is triggered, the Unison software will indicate where the alarm originated. Unison can send out information about the alarm via SMS or e-mail. Alarms can be displayed on graphical floor plans and audible signals can be generated at the workstation to uniquely identify the type of alarm via multi-media. Unison can be easily programmed to send messages to the user via SMS or e-mail. Reports created in Unison can easily be sent via email.

MULTI-TECH

Multi-Tech has 40 years of experience and over 80 patents for M2M (machine-to-machine) communication, which ensures good quality. Multi-Tech's products are tested and approved for use in over 80 countries. By connecting the Multi-Tech GPRS modem to Unison, the user can communicate through SMS. Unison provides full support for virtualization and clustering of databases and is an advanced platform developed for applications where scalability and high availability are of utmost importance.

DESCRIPTION

Message in case of events – Communication via SMS or e-mail can be sent in the case of any event or alarm.

Creating recipient groups for e-mail – Receivers can be grouped so that each e-mail recipient does not need to be added separately to an event. This simplifies handling of messages.

SMS Messages – Using SMS messages, users can be reached no matter of their location.

Send messages to users – Operators in Unison can easily send messages to users in Unison via email or SMS.
