

DATASHEET

UNISON ACCESS MODULE – SYMMETRY INTEGRATION

MAIN FEATURES

Received in Unison Client

- ▶ Door alarms
- ▶ Error messages
- ▶ Tamper alarms
- ▶ Status system

Managed from Unison Client

- ▶ Acknowledge alarms
- ▶ Reset alarms
- ▶ Pulse opening
- ▶ Manage door environments from the graphical interface
- ▶ Manage users/cards
- ▶ Manage permissions
- ▶ Import user data
- ▶ Read permissions

Support for automatic upload of configuration data.

PACOM Unison now offers a high level of interoperability with the SYMMETRY system. This integration allows users to seamlessly manage access control privileges from a single Unison security management platform for both online and offline doors.

PACOM UNISON

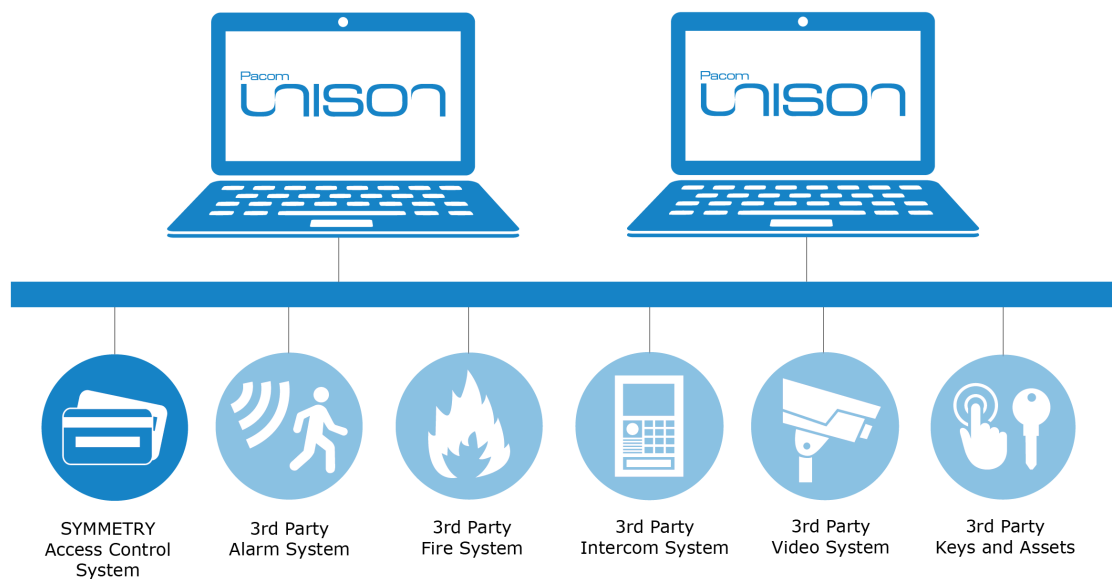

PACOM Unison is a market leading security management system engineered to provide a completely open and flexible solution for security management for virtually any building environment. Unison has been designed to provide tight integration with market leading access control solutions to allow the management and control of door access, administration of identity and cardholders, and the monitoring of any security breaches, using a powerful, intuitive and easy to use graphical interface.

SYMMETRY ACCESS CONTROL SYSTEM

Symmetry Access Control Systems are designed to suit every type and size of organization from small offices and colleges through to government agencies and multi-national corporations.

One of the greatest strengths of Symmetry is the software which is very easy to use and contains a huge range of features to increase security and improve productivity of the security and facility management teams. Whether the customer's requirement is simply to issue badges to open doors, or if alarm management, video and other security measures are important to the organization, Symmetry will be a great choice.

New users of Symmetry benefit from the very wide range of up-to-date software and integration features used in 30,000 Symmetry systems already installed around the world.

DESCRIPTION

Unison supports reading of system configuration from the SYMMETRY system for a fast and easy deployment. Unison supports complete management of door alarm messages (such as door forced, door held etc.), and the ability to assign access to a cardholder at any door. Doors can be easily monitored from Unison's Graphical User Interface (GUI) with full synchronization of live access logs from the SYMMETRY solution.

COMPATIBILITY

SUPPORTED COMPONENT	COMPATIBLE VERSIONS
SSMS Device Library	Version: 7.0.1.1842
SSMS Database	Version: 7.0.1 (120400)
Unison	V5.8

ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
110 001 001	USN-STD	Unison Standard. Includes support for one Unison client workstation.
110 001 002	USN-ENT	Unison Enterprise. Includes support for one Unison client workstation.
110 002 003	USN-ACM	Unison Access Module. Includes support for 10 doors.
110 003 003	USN-ACM-10	Unison license for 10 additional doors.
110 002 002	USN-ALM	Unison Alarm Module. Includes support for 50 alarm detectors.
110 003 002	USN-ALM 50	Unison license for 50 additional alarm detectors.
