

DATASHEET

UNISON – VIDEO MODULE

MAIN FEATURES

- ▶ Stream live video in response to an alarm or event
- ▶ Display live video by clicking on an icon in a graphical site map
- ▶ Pan, Tilt or Zoom (PTZ) the camera via onscreen controls or using a mouse
- ▶ Move the camera to a preset position or modify a preset position
- ▶ Save live image snapshots and video clips
- ▶ Stream audio from DVR to Unison
- ▶ Receive and manage alarms from cameras such as video motion detection, image loss and communication interruptions

PACOM Unison efficiently links video surveillance systems to other sub systems such as access control, alarm, fire and intercom to offer a powerful, integrated security solution that suits all types of businesses and organizations.

PACOM UNISON VIDEO INTEGRATION

PACOM Unison integrates with various video surveillance systems and links them to other sub systems to offer a highly reliable and automated monitoring solution.

Unison video module offers live streaming of video in response to an alarm or an event. An alarm is easily verified by automatically streaming a video from a camera located at the alarm point. This allows operators to take immediate action by focusing on relevant surveillance images. Unison can also receive and manage different types of alarms such as motion detection, image loss and communication interruptions from various cameras.

Unison communicates with the video surveillance system to import the configuration details, minimizing data entry and programming errors. The user friendly functions of the system, efficient bulk programming and the powerful graphic overviews including dynamic display of alarms and camera status, considerably simplifies management.

PACOM Unison Video Integration builds on your security solution by:

- Displaying the relevant camera views based on the type of alarm, time and logged on operator
- Linking alarms to real-time video, increasing safety and reducing reaction time
- Managing different types of alarms -motion detection, image loss and communication interruptions from various cameras
- Integrating with different sub systems to deter crime, ensure security 24/7 and enabling the monitoring of multiple areas from a single location

Note: This screenshot provides an example of the Integrated Video functionality.

SUPPORTED INTEGRATIONS

Unison's ability to integrate with different video systems enables organizations to preserve their original investments and consolidate them into a modern management platform. PACOM is committed to supporting ongoing development of video device drivers in line with market opportunities and as new technologies emerge.

Unison currently offers integration with third party video systems from the following manufacturers:

Aimetis Symphony	Avigilon	Axis IP	Dedicated Micros
exacqVision	FLIR	GeutebruckH.264	Hikvision
IndigoVision	IC Realtime	Lanaccess	Lilin
March Generic	March R5	Milestone	Mirasys
Vanguard			

Refer to the PACOM Unison Video Integration Comparison Matrix, individual video integration feature sheets and respective manufacturer's documentation for further details.

COMPATIBILITY

Unison:	5.7 or later
Integrated Video	1.0

ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
110 002 005	USN-VCM	Unison Video Module (Includes support for 25 cameras)
110 003 005	USN-VCM-25	Unison Video License to support an additional 25 cameras
110 001 001	USN-STD	Unison Standard Server (Support for up to 100 cameras)
110 001 002	USN-ENT	Unison Enterprise Server (Support for unlimited number of cameras)
