Security & Business Management on a Single Cloud-Based Platform

What is PACOM VIGIL CORE?

PACOM VIGIL CORE is an intelligent, centrally controlled all-in-one platform combining security and business management with cloud-based or on-premises options, cost-effective SaaS deployment, and advanced features, designed for monitoring data from a single site to thousands of remote sites with unlimited scalability and third-party interoperability.

Manage warehouse doors, shipping docks, loading bays, and administrative areas with real-time alerts and automation. Whether you have one facility or hundreds, our solution adapts to your needs.

PACOM designs, develops, and manufactures integrated security and business management systems that keep buildings, assets, and people safe. Our scalable and flexible solutions work effortlessly on-premises or in the cloud, providing reliable protection tailored to any environment.

One Platform, Multiple Solutions

VIGIL CORE combines access control and intrusion alarm, video verification, building management, and centralized alarm monitoring all in one system.

Integrate with third-party technology partner products like 3xLOGIC, NVR, DVR, ALPR, and wireless access control on the same platform using Open API to add value to business operations and save costs.

Access Control & Intrusion Alarm

Manage access control and intrusion alarms from a single browser-based platform.

- » Control who enters loading zones, offices, or restricted areas.
- » Monitor alarms from one user-friendly dashboard.

Centralized Alarm Monitoring - Real Life Events

Monitor real-time events across one site or thousands globally with VIGIL CORE.

- » Receive real-time alerts from all sites at once.
- » Consolidate data on a single platform, improving incident handling.

Video Verification - Make Informed Decisions

Perfect for managing alarms and real-time events, VIGIL CORE ensures precise responses and informed decisions with live video feeds instantly accessible.

- » Confirm the nature of alarms in seconds—fewer false alarms, faster responses.
- » Effortless connectivity with your existing cameras.

Unlock more than just security with VIGIL CORE.

Automate building environments to save energy and improve safety. Integrate existing or third-party sensors, or use PACOM's smart remote sensors for further cost and operational efficiencies.

- » Automate HVAC and lighting to reduce energy costs.
- » Use sensors for temperature, humidity, or vibration to protect sensitive goods.

What makes VIGIL CORE unique?

VIGIL CORE is a single and scalable cloud-based or on-premises security and business management solution combining access control and intrusion alarm, video verification, building management, and centralized alarm monitoring all in one system.

With PACOM VIGIL CORE, you're not just getting a security solution; you're investing in a business management tool that adapts to your needs, ensuring long-term success.

Why PACOM VIGIL CORE?

- » **Fewer Operational Delays:** Unified systems reduce manual tasks and speed up security processes.
- » **Cost Savings:** A single platform lowers hardware, software, and training costs.
- » **Scalable & Flexible:** Whether you run a single warehouse or a global network, PACOM VIGIL CORE grows with you.
- » **Greater Visibility:** Real-time monitoring across multiple facilities offers quick, data-driven insights.
- » **Peace of Mind:** Reliable technology, backed by 40+ years of industry expertise.

Software

VIGIL CORE Platform

VIGIL CORE is an intelligent, cloud-based, centrally controlled management platform. VIGIL CORE can be deployed in the cloud, on-premises or a hybrid environment providing a flexible and long-term solution for the user. VIGIL CORE has been designed primarily for monitoring data such as access control, alarms, etc. from one to thousands of sites for any organization.

VIGIL Video Appliance

Designed for small and medium businesses, the VIGIL Video Appliance meets the demands of cost-conscious customers seeking an efficient and user-friendly camera and recorder solution. The VIGIL Video Appliance supports 8 ONVIF 3xLOGIC cameras. Other ONVIF camera brands are also supported.

VIGIL CORE VIMS

The VIGIL CORE Management System (ViMS) is a software solution within the VIGIL CORE Platform designed for a quick and accurate enrollment and identification of visitors in facilities.

VIGIL CORE Features

- » Built with the latest web technologies
- » Alarm notification pop-up and alert
- » Cloud friendly, fully web-based
- » Programmable Logic Rules
- » Horizontal scalability, unlimited connections
- » Supports unlimited users
- » Supports MS SQL and PostgreSQL databases
- » Supports multiple languages
- » IoT Compatible - Device Analytics
- » Supports full site partitioning and audit history
- » Recommended OS Ubuntu Linux
- » Open API - every function is accessible
- » Supports unlimited hardware IO devices
- » Supports Dynamic Server Environment unlimited redundancy
- » Integration to third-party monitoring systems
- » Unlimited web client connections

VIGIL CORE Reports

VIGIL CORE Reports guide you in making smarter, more informed decisions using the fully integrated Reporting and Dashboard modules. Gather data from real-time key system metrics or develop insights from historical trends.

APPS

The VIGIL CORE Manager

The VIGIL CORE Manager App provides mobile optimised Dashboard Summary, Event Notification, Alarm Management, Door Control, Video Verification and User Monitoring.

Frequently asked questions

1.

Q: What is PACOM VIGIL CORE?

A: PACOM VIGIL CORE is an intelligent, centrally controlled all-in-one platform combining security and business management, cost-effective SaaS deployment, and advanced features, designed for monitoring data from a single site to thousands of remote sites with unlimited scalability and third-party interoperability.

2.

Q: Why choose VIGIL CORE for commercial and logistics?

A: VIGIL CORE is a comprehensive security solution for commercial and logistics operations, such as warehouses and distribution centers. It combines access control and intrusion detection into one platform, providing seamless, scalable security that adapts to the unique challenges of these environments.

3.

Q: How can users benefit from VIGIL CORE?

A: VIGIL CORE offers a complete, scalable solution for commercial and logistics businesses of all sizes. It helps streamline operations, reduce labor costs, and deliver faster ROI, making it a reliable, long-term investment.

4.

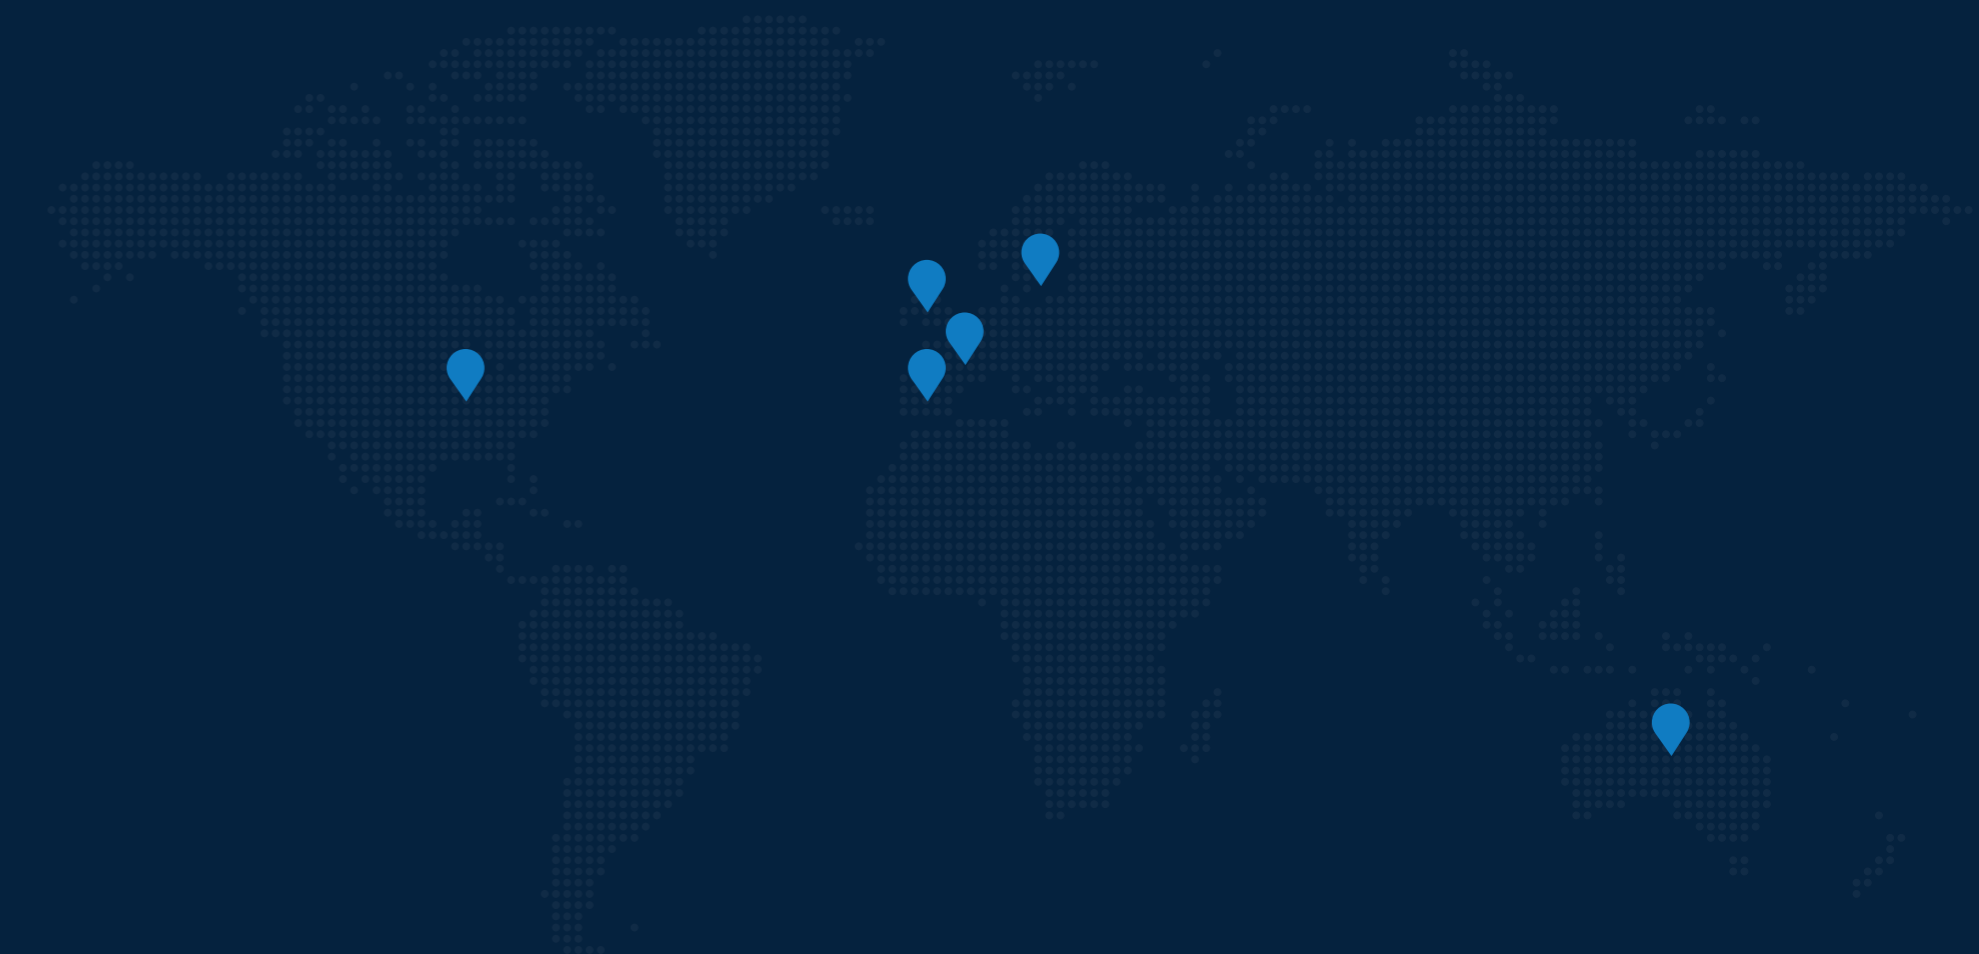

Q: What specific ROI benefits can users expect from VIGIL CORE's SaaS solution?

A: VIGIL CORE delivers ROI for commercial and logistics users by reducing labor and hardware costs. Its unified platform minimizes security system expenses, while features like 24/7 maintenance and automatic updates ensure cost-effectiveness and long-term efficiency.

5.

Q: Will VIGIL CORE be suitable for my business?

A: Yes, VIGIL CORE is suitable for commercial and logistics businesses of all sizes. Its unified platform offers both cloud and on-premises options, providing flexibility to meet the unique security needs of your operations.
